

SIP TRUNKING

Get the **MOST** out of your Telecom Platform

SIP Trunking allows for businesses to significantly decrease costs while combining voice and data requirements into a streamlined solution. Update voice systems to advanced, clear, and capable VoIP communications. Connecting their telephony and communication networks across multiple sites.

- Limit heavy data usage and costs as well as maximizing your network capacity
- Improve voice quality
- Increase delivery options for your voice traffic
- Merge and allocate your voice and data on one platform
- Lower equipment costs and simplify the management of your data
- Decrease costs of long distance and inter-office calling by over 50%
- Supports conferencing, toll free services, on-premise Hosted PBX...
- Modernizes your system along with hardware upgrade options
- A system that is easier to configure, manage and scale!

WHY CHOOSE ECI?

- We are local, customer service driven, offering on-site and real time support with incredible industry knowledge.
- With a phone system managed by us, you never have the headache or expense of upgrades to systems or annual contracts.
